Inko PDF SDK

Synthetic Integration Fixture

This document is generated by NextH for rendering, annotation, save, restore, and page-navigation tests.

It contains no customer data, third-party prose, third-party images, or external font files.

What this PDF exercises

1

12 pages

Supports page navigation, lazy rendering, and revisit checks.

2

Vector text

Uses only PDF standard Helvetica fonts and source-owned copy.

3

Tables and rules

Provides clear targets for pens, highlighters, shapes, and erasers.

4

Stable metadata

Uses deterministic generation settings for repeatable review.

Review matrix

Item	Owner	State	Review note
Section 01	Reviewer 1	Draft	Synthetic row for annotation testing
Section 02	Reviewer 2	Review	Synthetic row for annotation testing
Section 03	Reviewer 3	Approved	Synthetic row for annotation testing
Section 04	Reviewer 1	Follow-up	Synthetic row for annotation testing
Section 05	Reviewer 2	Draft	Synthetic row for annotation testing
Section 06	Reviewer 3	Review	Synthetic row for annotation testing
Section 07	Reviewer 1	Approved	Synthetic row for annotation testing
Section 08	Reviewer 2	Follow-up	Synthetic row for annotation testing
Section 09	Reviewer 3	Draft	Synthetic row for annotation testing
Section 10	Reviewer 1	Review	Synthetic row for annotation testing

Annotation practice zones

Use this page as a neutral target for drawing, highlighting, selecting, clearing, saving, reloading, and comparing annotation state. All labels are synthetic.

ZONE 1

Synthetic review prompt 1.1

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 2

Synthetic review prompt 1.2

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 3

Synthetic review prompt 1.3

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

Save and restore checkpoints

Use this page as a neutral target for drawing, highlighting, selecting, clearing, saving, reloading, and comparing annotation state. All labels are synthetic.

ZONE 1

Synthetic review prompt 2.1

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 2

Synthetic review prompt 2.2

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 3

Synthetic review prompt 2.3

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

Layer comparison worksheet

Use this page as a neutral target for drawing, highlighting, selecting, clearing, saving, reloading, and comparing annotation state. All labels are synthetic.

ZONE 1

Synthetic review prompt 3.1

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 2

Synthetic review prompt 3.2

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 3

Synthetic review prompt 3.3

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

Long-document navigation

Use this page as a neutral target for drawing, highlighting, selecting, clearing, saving, reloading, and comparing annotation state. All labels are synthetic.

ZONE 1

Synthetic review prompt 4.1

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 2

Synthetic review prompt 4.2

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 3

Synthetic review prompt 4.3

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

Review decision record

Use this page as a neutral target for drawing, highlighting, selecting, clearing, saving, reloading, and comparing annotation state. All labels are synthetic.

ZONE 1

Synthetic review prompt 5.1

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 2

Synthetic review prompt 5.2

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 3

Synthetic review prompt 5.3

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

Host integration checklist

Use this page as a neutral target for drawing, highlighting, selecting, clearing, saving, reloading, and comparing annotation state. All labels are synthetic.

ZONE 1

Synthetic review prompt 6.1

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 2

Synthetic review prompt 6.2

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 3

Synthetic review prompt 6.3

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

Rendering contrast samples

Use this page as a neutral target for drawing, highlighting, selecting, clearing, saving, reloading, and comparing annotation state. All labels are synthetic.

ZONE 1

Synthetic review prompt 7.1

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 2

Synthetic review prompt 7.2

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 3

Synthetic review prompt 7.3

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

Keyboard and pointer notes

Use this page as a neutral target for drawing, highlighting, selecting, clearing, saving, reloading, and comparing annotation state. All labels are synthetic.

ZONE 1

Synthetic review prompt 8.1

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 2

Synthetic review prompt 8.2

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

ZONE 3

Synthetic review prompt 8.3

Add a mark here, export canvasData, reload the document, and confirm that the host-provided state is restored as expected.

Rights-safe sample checklist

- Generated from scripts/generate-oss-sample-pdf.py
- No customer, government, or partner document content
- No personal information or external images
- No bundled font files; standard PDF Helvetica only
- Stable title, author, subject, and fixture identifier
- Suitable for source, build, example, and automated test paths

End of synthetic fixture

If this file changes, regenerate it from source and repeat render, text, metadata, and viewer regression checks.
